

## Mobile Payment Terminal

The S920 is a compact mobile point of sale terminal, packed with a complete range of payment industry certifications and is manufactured with the highest of global standards using state-of-the-art technology and high-end materials.

Featuring a large ultra-clear high-definition multimedia color touch screen and a beautiful back-lit keypad, the compact size and communication capability make it an excellent option for pay-at-table, delivery and remote services, where portability, usability and seamless customer interaction are key requirements. The long lasting battery and the high-speed processor delivers faster transaction time and extended hours of operations. Embedded contactless (NFC/MSD) technology allows for simply tap and go payment.

4G LTE and WiFi connectivity options are complemented by a highly secure platform, making it an ideal solution for value-added software applications.

### Features

#### Exceptional stability & reliability

- Ultra high speed 32-bit ARM 11 processor
- 384MB memory
- Battery management technology

#### Hardware features

- Fast thermal printer (30LPS), supporting up to a 58mm roll
- Built-in contactless (EMV and MSD) & NFC
- 4G LTE and WiFi processing capability
- Integrate PIN Pad
- Dial and Ethernet processing capability
- Integrated Card Readers
  - iCC (EMV)
  - 3 Track Bi-directional card reader
  - NFC and MSD capable Contactless Reader

#### Secure, flexible operating system

- User-friendly, ultra-clear color touch display
- Multitasking operating system application integrity

#### Unprecedented security

- PCI PTS 4.x, SRED
- P2PE 2.0 Capable

#### Physical characteristic

- 3.5 inch display (240 x 320 pixels)
- Size 5.9 x 3.0 x 1.7 (inches)
- 11.6 ounces with battery
- Long lasting Li-ion battery
